SUMMARY

About 2 years of experience in programming ERP software and 6 Months experience in web development using JavaScript stack, Node, Express, React and Mongo DB. Developed multiple API's in Express.js and UI Components using React.js Library.

COMPUTER SKILLS

Data Structures, Algorithms, JavaScript, Java, Express.js, MongoDB, React.js, HTML5, CSS3

EXPERIENCE

Business technology Analyst (Software Developer) 2019-Present

Deloitte USI

- Built 14 UI modules which after Go live take error rate of user interacting with system down by 50% in compared to 90% error rate earlier.
- Developed multiple APIs with JWT authorizations for secure API calls and response.
- Worked in SAP ABAP to develop different reports to be used by business to get information about sales order.
- Enhanced SAP Sales order screen (Both SAP end using ABAP and Fiori using UI5 a technology based on HTML5) to make it user friendly and handle error explicitly before a sales order is created.
- Created Authorization module before a sales order being created to avoid unauthorized order creation.

PROJECTS

Fooder Food delivery app

<http://team-fooder.herokuapp.com/>

- React/Redux POC app.
- Role based login/register.
- Mongo Atlas is used for database.
